- (54) Title: ACCESSORY ARRANGEMENT FOR A REFRIGERATOR DOOR AND CAN HOLDER FOR A REFRIGERATOR

(57) Abstract: An accessory arrangement for a refrigerator door, said accessories being in the form of can holders (20), median shelves (30), wire frame shelves (30a), and other means for supporting the products to be refrigerated, said door (10) of the refrigerator having an internal wall (11) carrying retaining means (12), which are identical to each other and disposed according to horizontal rows and vertical columns, each retaining means (12) being able to receive and retain, simply by fitting a respective engaging means (40) incorporated to one of said accessories to be removably affixed to the internal wall (11) of the door (10). The distances between the vertical columns of the retaining means (12) and the widths of the accessories are designed so that the useful width of said internal wall (11) is fully occupied with multiple accessories adjacently disposed side by side.
